

Features

Hard Start Kit, Relay and Start Capacitor SPP5 SPP6 HS600 HS650

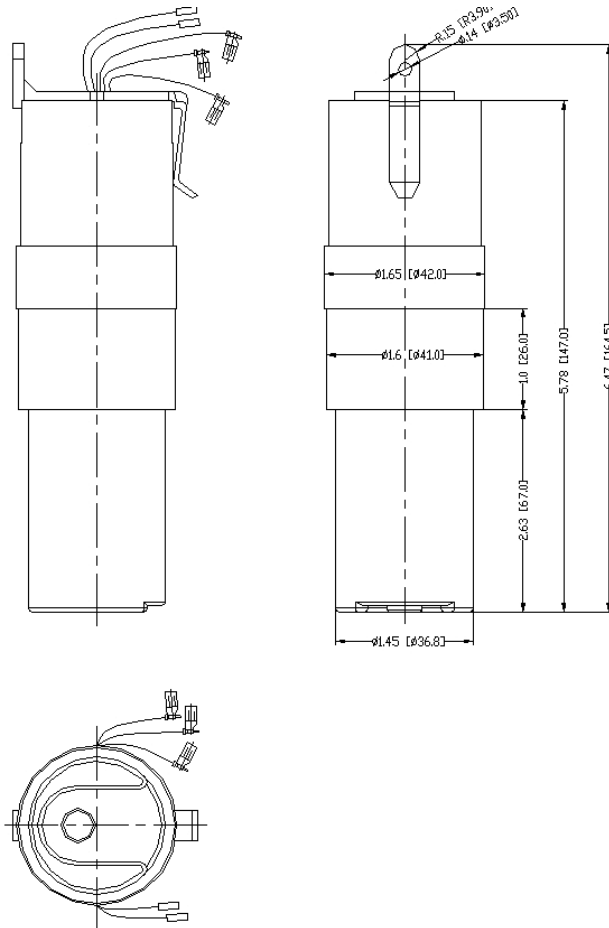

This type capacitor is from bakelite capacitor based on special design for single AC motor and single phase AC hest pump system which is installed with operational capacitor(PAS). It may increase the starting torque of motor(heat pump). Can used on all PSC single phase 120V-288V air conditioner units from 4000-120000BTU.

Applicable scope: Single AC heat pump system in AC circuit.

Operating Voltage:110-330Vac

Power:1/2-10HP

Capacitor Drawing

Specification

- 1) Increases starting torque up to 500%
- 2) Start Capacitor and Relay
- 3) Totally solid state integrated design
- 4) Fast, easy wires installation
- 5) Three mounting options: clip, screw, capacitor bracket
- 6) Individually packed
- 7) Applications: air conditioner, refrigerator, starting compressors

Part No.	Capacitor	HP	SUPCO	Voltage Max
HS600	43-52uF	1/2—5 HP	SPP5	115 - 277VAC
HS650	130-156uF	1/2—10 HP	SPP6	115 - 277VAC
